

# Omar Shawada

## Production Planning & Supply Chain Engineer

Location: Dakahlia, Egypt — Willing to Relocate

Phone: 01284475489 | Email: shawada6@gmail.com | LinkedIn: linkedin.com/in/omarshawada

---

### PROFESSIONAL SUMMARY

Production Planning & Supply Chain Engineer with 2+ years of experience in high-complexity manufacturing environments. Specializes in demand planning, BOM-level root cause analysis, SAP ByDesign order management, inventory optimization, and AI-powered scheduling tools. Built and deployed three original digital tools that transformed planning visibility and eliminated manual bottlenecks — documented on LinkedIn with 10,000+ combined impressions. Currently pursuing CPIM v8 (APICS).

---

### KEY ACHIEVEMENTS & DIGITAL INNOVATIONS

- **AI-Powered Dynamic Scheduling System (AKL Production Planner):** Built a full scheduling web app using vibe coding + AI. Accepts Excel production plan as input; outputs real-time Schedule + Machine Loading reports. Supports live re-prioritization when machine status, order priority, or capacity constraints change — eliminating hours of manual rescheduling daily.
- **Assembly Analyzer — BOM Root Cause Engine:** Developed an intelligent Excel tool mapping every production stoppage to its exact BOM level and root cause. Color-coded classification system (simple / deep BOM / procurement shortage / shared-component conflict) enables instant decision-making and data-driven purchasing priorities.
- **Gen AI Planning Agent:** Designed a 3-step AI planning workflow: Data Cleaning → AI Agent with prompt-engineered instructions → Output Validation. Auto-generates Ready-to-Assemble and Waiting-on-Injection reports from raw Excel data.
- **Supply Chain Power BI Dashboard:** Built a real-time dashboard covering procurement shortages, production status, component issues, sales performance, and delayed orders — single source of truth for management.

---

### PROFESSIONAL EXPERIENCE

**Production Planning Engineer** | AKL Auto Feeding Industries | Apr 2025 – Present

#### Demand & Production Planning

- Manage and prioritize sales allocation orders in **SAP** ByDesign ensuring high-priority customers are fulfilled first while maintaining **OTIF** targets.
- Develop daily and weekly production schedules using Excel and SQL, translating demand signals into executable floor plans.
- Monitor production progress in real time; identify **bottlenecks** and propose corrective actions to prevent delivery delays.
- Collaborate with Sales to provide accurate, data-backed delivery timelines and manage customer expectations proactively.

#### Procurement & Inventory Management

- Calculate Reorder Points (ROP) and Safety Stock levels to ensure uninterrupted production and minimize stockout risk.
- Coordinate with Purchasing to align raw material availability with production schedules; prepare monthly shortage reports.
- Lead cross-functional initiatives with Purchasing and Engineering to source alternative materials — improving cost, quality, and lead times.

#### Data Analysis & Reporting

- Use SQL queries (beginner level) to extract data from SAP ByDesign for scheduling, shortage tracking, and performance reporting.
- Generate **BOM-level** production status reports highlighting stoppages caused by material or component issues across all assembly levels.

- Maintain structured documentation to support cross-departmental decision-making and operational efficiency.

**Workshop Operations Manager** | Independent Workshop / May 2024 – Apr 2025

- Managed end-to-end workshop scheduling, material planning, and client delivery coordination.
- Led digital transformation: designed AppSheet mobile app with Poka-Yoke interface deployed across all machines — enabling data collection and waste analysis for the first time.
- Applied Lean principles: part nesting optimization, 5S implementation, micro-joint techniques to reduce material waste and bending costs.
- Translated client requirements into SolidWorks and AutoCAD designs; generated laser-ready files via Cypcut software.

**TECHNICAL SKILLS**

---

**Planning & Supply Chain:** Production Scheduling, Demand Planning, BOM Analysis, OTIF, ROP, Safety Stock, MRP, Capacity Planning

**ERP & Data:** SAP ByDesign (PP, MM, SD), SQL (Beginner), Excel, Power Query, Data Visualization

**AI & Automation:** Custom GPT Planning Agent, Claude AI, Vibe Coding, AppSheet, Gen AI Workflows

**Design & Lean:** SolidWorks, AutoCAD, Lean Manufacturing, 5S, Kaizen, OEE, Poka-Yoke

**EDUCATION**

---

**B.Sc. Mechanical Power Engineering — Mansoura University**

Accumulative Grade: Good (67.33%) | 2017 – 2022

**CERTIFICATIONS & PROFESSIONAL DEVELOPMENT**

---

- CPIM v8 – Preparation Program (APICS) — In Progress
- Supply Chain Digital Transformation — SQL, AI Agents, Custom GPT, Data Analysis
- Data Analysis & Visualization — Excel, SQL, Power BI
- SAP Introduction — PP, MM, SD Modules
- AI Copilot: AI Productivity & Business Automation
- Process Improvement Foundations — LinkedIn Learning
- 100 Essential Management Concepts — Almentor
